

# Pediatric Dentistry in Fremont

A bad experience by a child at the dentist's or the doctor's office sets the stage for a lifetime of phobias and delayed care as well as increased anxiety and fear. For those children requiring dental care that cannot be accomplished without their cooperation, we offer general anesthesia designed specifically for children and administered by experts in the field to make sure your child is safe and well cared for.

According to the American Academy of Pediatrics and the American Dental Association, children should start visiting the dentist by their first birthday. The care of so-called "baby teeth" is vitally important and regular dental visits set the stage for good oral health throughout a child's life. Elite Surgical Center is proud to partner with Excellent Pedodontists (Pediatric Dentists) in the Bay Area to offer outstanding pediatric dentistry in Fremont designed to give your child the best possible start on a lifetime of smiles.

Our outstanding team of professionals understands the finer points of working with children and how to create a pleasant experience for your child. The comfort of our young patients, and the peace of mind of their parents, are always top priorities.

To learn more about top quality, gentle, and safe pediatric dentistry at **Elite Surgical Center** in Fremont, call us at (510) 556-5000 or visit our contact page.
